

CREO DESIGN PACKAGES: **YOUR BEST DESIGNS IN LESS TIME**

Engineering the way it should be

IF YOUR SOFTWARE
ISN'T UP TO SPEED,
YOUR COMPANY MAY
BE LOSING OUT TO
THE COMPETITION.

WHAT ARE THE COMMON EXCUSES YOU HEAR FOR HOLDING ONTO OUTDATED SOFTWARE?

- It still works. Why replace it?
- We don't have the budget.
- We can't retrain everyone.
- We have too much legacy data.
- We don't need new features.

These concerns are common. But they often distract from the important reality: the product development landscape is evolving faster than ever. Teams that adopt the most current versions of Creo are better equipped to handle complex products, protect intellectual property, and move from concept to production with confidence. With Creo, you'll gain:

- Access to modern design and validation capabilities like AI, real-time simulation, generative design, model-based definition, and CAD/CAM workflows.
- The latest security features to avoid cyber-attacks.
- Streamlined, intuitive workflows that are easier to use and improve team productivity.

INTRODUCING CREO DESIGN PACKAGES

Keeping up with technology can be a headache—and expensive. The good news is that Creo is available in a variety of CAD packages.

Subscribe to the package that meets your needs today. All offer Creo with the essential tools everybody needs to produce professional 3D CAD work. Plus, every subscription comes with premium support.

HELP CHOOSING YOUR PACKAGE

The following pages can help you choose the best package for your business. Read on to discover the most helpful capabilities for anyone in product engineering and design.

SELECT YOUR PACKAGE

Industry Standard 3D CAD Capabilities

AI Assisted Broad Design Guidance

Top Down Design & Concurrent Engineering

Prismatic & Multi-Surface Milling

Engineering Notebook

Advanced Surfacing & Additive Manufacturing

GD&T & Tolerance Analysis

Mold Design & High-Speed Milling

Advanced Multi-CAD Collaboration

Simulation & Fatigue Advisor

Production Machining

Interface for JT

IoT-driven Product Insight

Advanced Simulation

Options Modeler & Generative Design (GTO)

Metal Printing & Complete Machining

Clearance and Creepage Analysis

CREO+

PTC Control Center

Real-Time Collaboration with Creo+

IS YOUR DESIGN SOFTWARE KEEPING UP? HONESTLY ASSESS YOUR CAD ENVIRONMENT

ARTIFICIAL INTELLIGENCE

Does your software integrate AI to achieve real engineering productivity? Is your data securely maintained when working with AI? With the quick advancements in AI, it's important that your software thoughtfully integrates AI to speed up engineering tasks while maintaining safeguards and design traceability.

The Creo AI Assistant can provide general guidance to all designers, or model-aware guidance and automation in add-on extensions.

EFFECTIVE DESIGN GUIDANCE

Are you confident you're making the best decisions possible? Your software should provide real-time feedback on your design decisions as you make them—freeing you up to try out more ideas and iterate faster. [Creo Simulation Live is available as an add-on to all packages.]

Creo Simulation Live provides real-time feedback as you make design changes.

GENERATIVE DESIGN

Is your software working within your constraints to create optimal designs? With new technologies like topology optimization and generative design, your software generates options for more efficient designs based on your input. The results lead to more innovative, efficient, and competitive products. [Available in DEP]

Generative design offers users a selection of AI-driven designs based on input, including manufacturing method. "[On-premise GTO is available in Design Engineering Professional package. Cloud-based GDX is available as an extension.]"

ADDITIVE MANUFACTURING

Are you fully designing for additive manufacturing? Your system should allow you to prepare parts, including parametrically driven lattices; optimize tray placement; and integrate directly with industry-leading 3D printers. [Available in DAP, DE, DEP.]

Design, optimize, validate, and run a print check in Creo. Works with polymers and metals.

*Key: DE=Design Essentials, DA=Design Advanced, DAP=Design Advanced Professional, DE=Design Engineering, DEP=Design Engineering Professional.

GD&T ADVISOR

Adopting a model-based engineering environment? Use your CAD system to ensure your designs comply with GD&T standards throughout the application process—speeding up your work and preventing costly errors. [Available in DAP, DE, DEP]

Creo GD&T Advisor Extension takes the tedium and inaccuracies out of geometric dimensioning & tolerancing.

RENDERING

Can you create photorealistic geometry? For those in consumer products, seeing a model under good lighting and in everyday settings shouldn't be an afterthought. [Available in all packages.]

Rendering tools add life-like materials, lighting, and backgrounds to models.

AUGMENTED REALITY

Can you summon a fully immersive 3D tour of your work with a single click? Augmented reality experiences should be easy to generate and share. Plus, they should be secure from unwelcome viewers. [Available in all packages.]

Creo AR Design Share helps every team visualize the design before moving to production.

FASTENERS

Work with screws, nuts, bolts, washers, pins, and dowels? A library of common fasteners and automatic, intelligent tracking, and placement can help you avoid errors (and tedium) while building complex models. [Available in all packages.]

Creo IFX includes a large, customizable library of fasteners.

ADVANCED ASSEMBLY

Can your team work concurrently to build your complex products? Top-down structures and skeletons ensure that anybody can create and modify components and subassemblies without stepping on others' work. [Available in DA, DAP, DE, DEP.]

Creo Advanced Assembly Extension ensures the whole design team stays up to date.

ROUTED SYSTEMS DESIGN

Needing to streamline electrification? Automate your piping, cabling [Available in all packages], and clearance and creepage analysis harness manufacturing [available as extension] [Available in DEP.]

Creo PCX, Creo CCX, and Creo HMX automate every step of the way, reducing design cycles.

ENGINEERING CALCULATION SOFTWARE

Are your calculations driving your designs and vice versa? The Creo Engineering Notebook, powered by PTC Mathcad, provides a true digital engineering notebook, tracking and communicating your calculations. Now, nobody ever has to wonder, "How did you get that number or dimension?" [Available in DA, DAP, DE, DEP].

DEDICATED LEARNING

With every license of Creo, you get access to PTC University's Learning Connector which gives you videos and playlist tutorials for Creo help. If you're looking for more, check out LEARN Online for access to instructor-led and self-guided learning courses."

HOW DID YOUR SOFTWARE DO?

If you've fallen behind, there's good news. The right package can provide you with more capabilities, at a lower cost, than you might think.

For more help deciding, check out the CAD Buyer's Guide Checklist.

>>> THE CREO ADVANTAGE

Creo is the 3D CAD solution that helps you accelerate product innovation to build better products faster. Easy-to-learn Creo uses a model-based approach to seamlessly take you from the earliest phases of product design to manufacturing and beyond. Combining powerful, proven functionality with new technologies including AI, generative design, real-time simulation, advanced manufacturing, and augmented reality, Creo helps you iterate faster, reduce costs and improve product quality. Creo is also available as a SaaS product, Creo+, providing innovative cloud-based tools for real-time collaboration and streamlined license management and deployment. The world of product development moves quickly, and only Creo delivers the transformative tools you need to build competitive advantage and gain market share.

WHY SUBSCRIBE?

Licenses of Creo Design packages are available via annual subscription. That ensures you have the support, eLearning, and services you need at one price. Plus, you pay a lower up-front cost to get started. Scale up or change capabilities as your business needs change. To further lower your costs, consider cloud deployment where available.

EXPLORE CREO PACKAGES

With the Creo Design packages, you'll have the latest capabilities and premium support. Plus, you'll be able to upgrade to the latest version of Creo at any time. Find the best package for your changing needs today.

CAD BENEFITS OF SAAS - EXPANDING THE BENEFITS OF DIGITAL TRANSFORMATION

ACCELERATE INNOVATION WITH REAL-TIME COLLABORATION:

Multiple contributors can work concurrently in real-time for improved communication and enhanced innovation throughout the product design lifecycle.

EFFICIENT LICENSE MANAGEMENT:

Reduce time and effort of managing and deploying licenses, using cloud-based desktop tools. Deliver required entitlements to groups and users efficiently and at scale.

BETTER USER EXPERIENCE:

Automatic updates ensure all users have access to the latest improvements.

DATA SECURITY:

Intellectual property is protected through better access control. Avoid sending files through email and unsecured servers.
